

2<sup>nd</sup> largest **bridge** inventory  
4<sup>th</sup> largest **interstate** network  
5<sup>th</sup> highest **traffic** volume  
35<sup>th</sup> in geographic **size**

Ohio has a critical need for funding  
to maintain safe roads, highways and bridges.

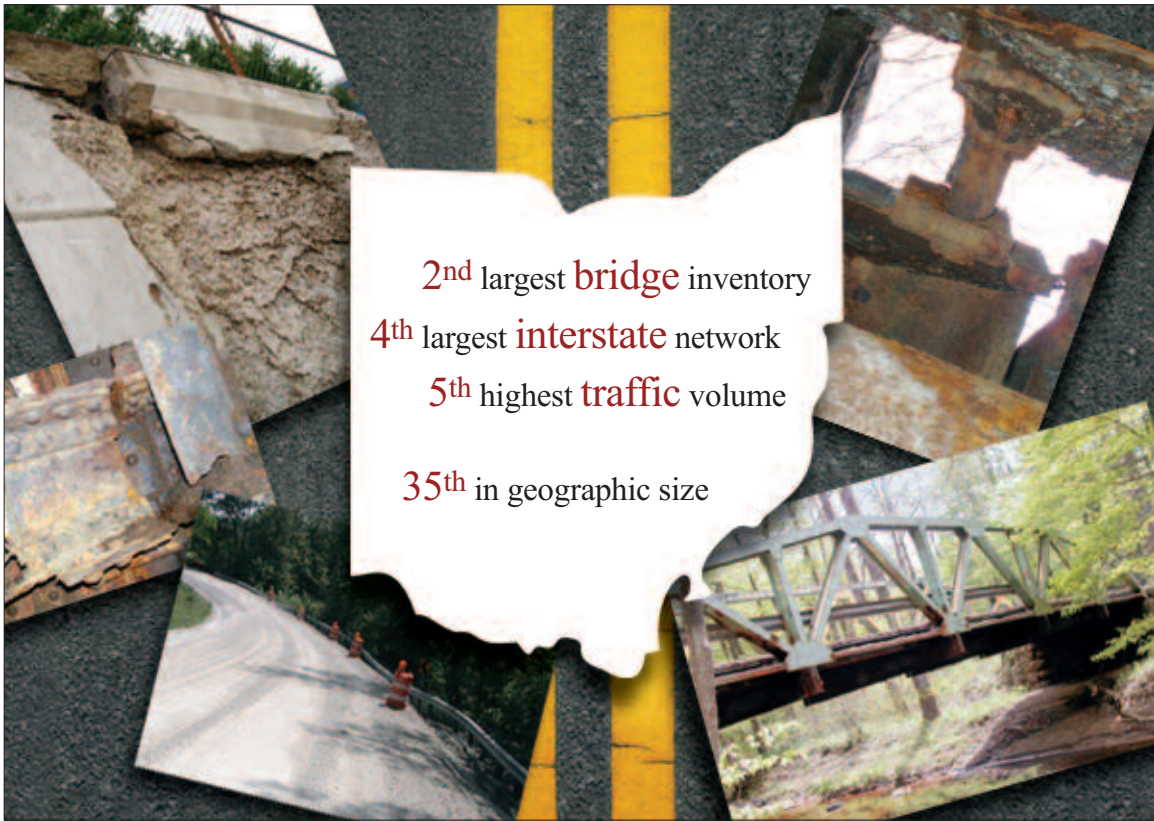

*The need is great. The need is now.*

- Ohio counties are facing increasing amounts of repairs and skyrocketing supply costs; The purchasing power of public funds has declined more than 40% since 2003.
- Every \$1 billion invested in transportation generates more than \$2 billion in economic activity and creates nearly 35,000 jobs.
- Two-thirds of county highways do not meet minimum safety widths.
- Ohio's 29,000+ miles of county roadway require more than \$230 million annually in resurfacing costs alone.
- \$770 million is needed for critical repairs to more than 6,000 Ohio county bridges with deficient ratings.
